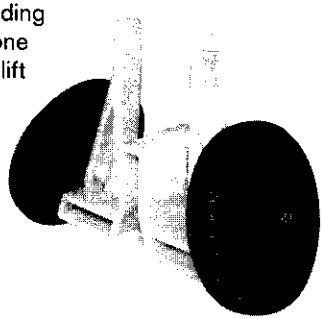
Table Mover by Impact

Operating Instructions

Carefully read these instructions before using

The TableMover™ will allow you to easily move folding tables across horizontal surfaces by supporting one end on its cradle between two wheels, while you lift the other and steer the table to your destination.



Designed to accommodate:

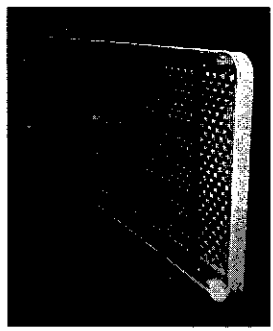
- All folding tables smaller than 4 ft. by 12 ft.
- A tabletop thickness of 7/8" or less
- A total weight of 150 lbs. or less

The TableMover™ is ergonomically designed and helps reduce back injury.

Precautions

To prevent injury, be careful of sharp edges and unbalanced loads when handling and moving a folding table. Never place a TableMover™ under the short side of a table or the load may tip. Lift properly when loading or unloading a table to prevent personal injury. Never leave a table in the TableMover™ unattended.

Instructions



1. Place the TableMover™ on the floor near the end of the table, with the wheels forward, stand the table on edge (longest edge down).
2. Carefully lift the end of the table, position the TableMover™ under the table and closer to the center of the table. This may reduce the effort required to lift the opposite end.
3. While balancing the table in the TableMover™, keep your hands on the top to steady the table, and move to the end away from the TableMover™.
4. With both hands, lift the unsupported end of the table and roll it to the desired location for setup, guiding its direction by moving left or right. The TableMover™ will steer easily.
5. Carefully remove the table from the TableMover™, and properly setup, or store and secure the table.

Warranty

The TableMover™ is warranted for 1 year against defects related to material and workmanship when operated according to these instructions. This warranty is limited to the repair and/or replacement of the product. No other warranties express or implied are included.
