

June 1, 2020

Allocation Notice:

We are currently allocating a number of COVID-19 related high demand items including: Disposable Gloves and Soap Dispensers.

Allocation Process: Since March 1st, we have been evaluating our inventory of affected items routinely and allocating a percentage of the current available inventory based on the customers previous purchases of each available SKU.

Current Disposable Glove Environment:

The disposable glove industry is experiencing critical challenges in fulfilling orders. Lead times are greatly extended, and pricing volatility is unprecedented:

- Demand has increased sharply worldwide.
- Shipments are being delayed due to new export regulations implemented by the Chinese government.
- Governments are requiring that a certain percentage of production of gloves manufactured in Southeast Asia be allocated for local use.
- Factories are experiencing increases in raw material and labor cost, and are also increasing pricing due to high demand.
- We are receiving significant price increases on all types of disposable gloves even on existing orders; future orders are not being priced until time of production.

Certainly this is new ground for all of us. We thank you for your understanding, patience, and for your continued business as we navigate through these unusual times.
