

MYTH BUSTER SERIES

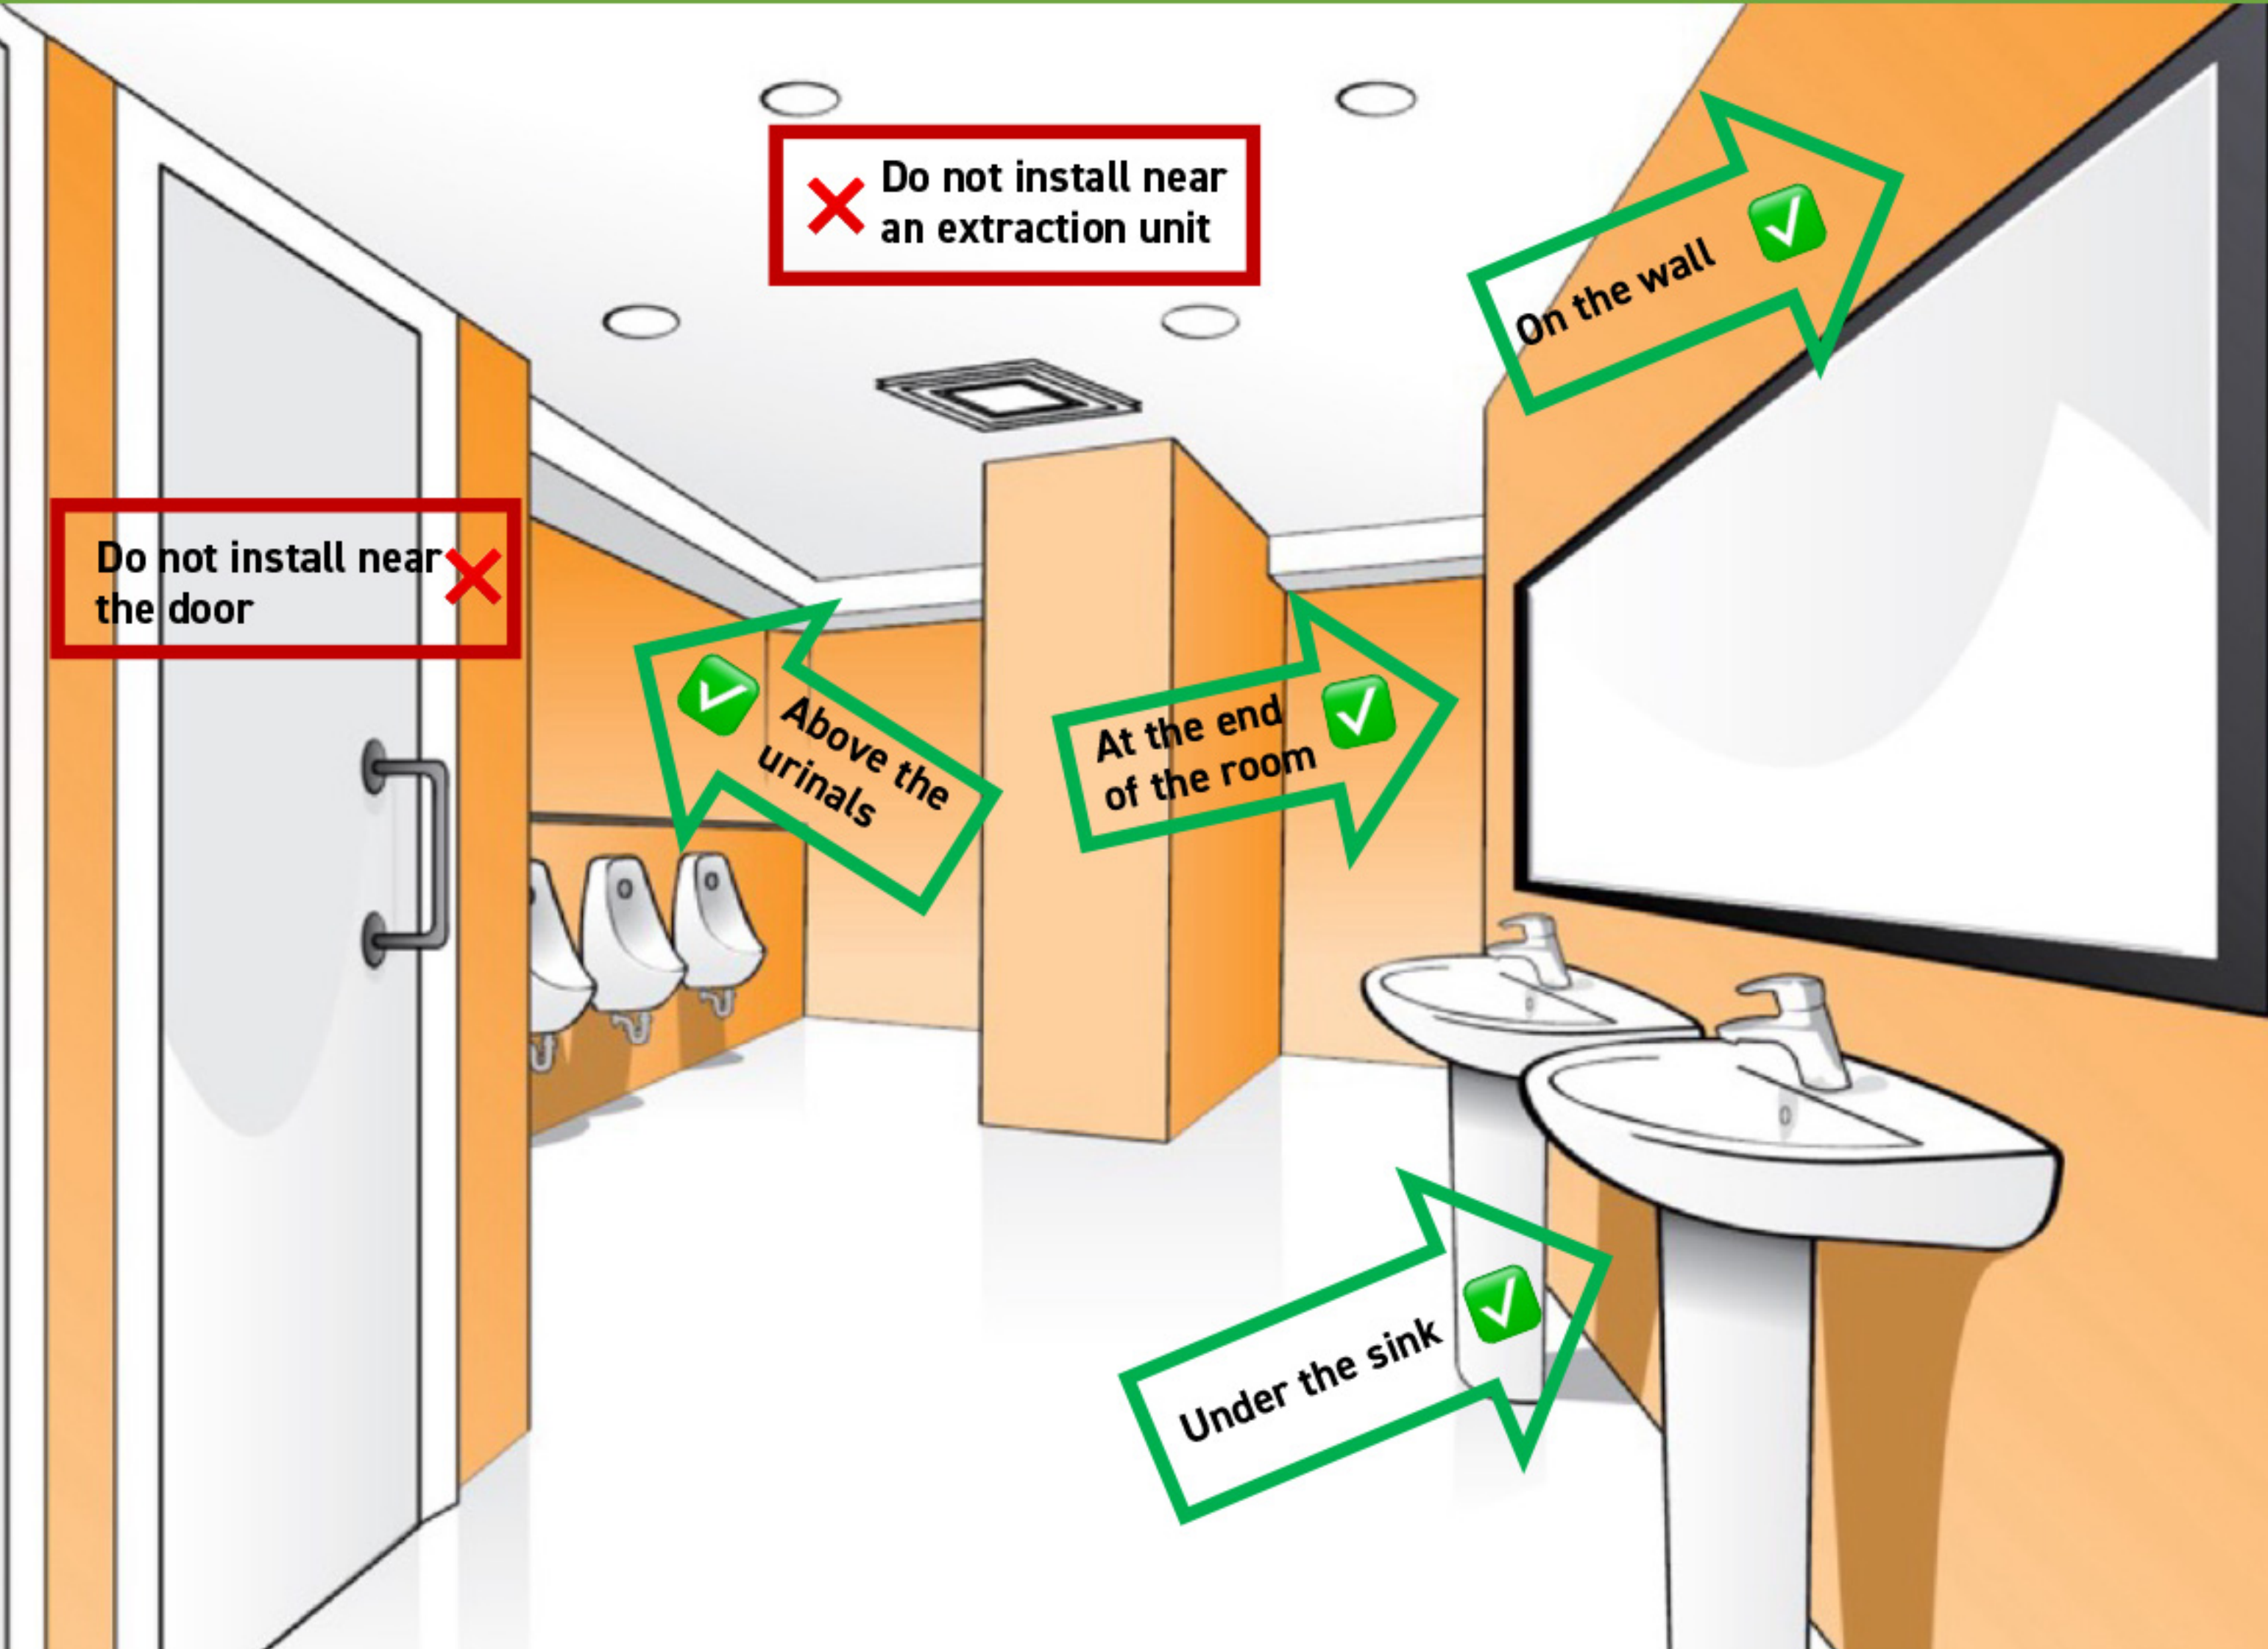

Myths Vs Facts about **oxy-gen**® products

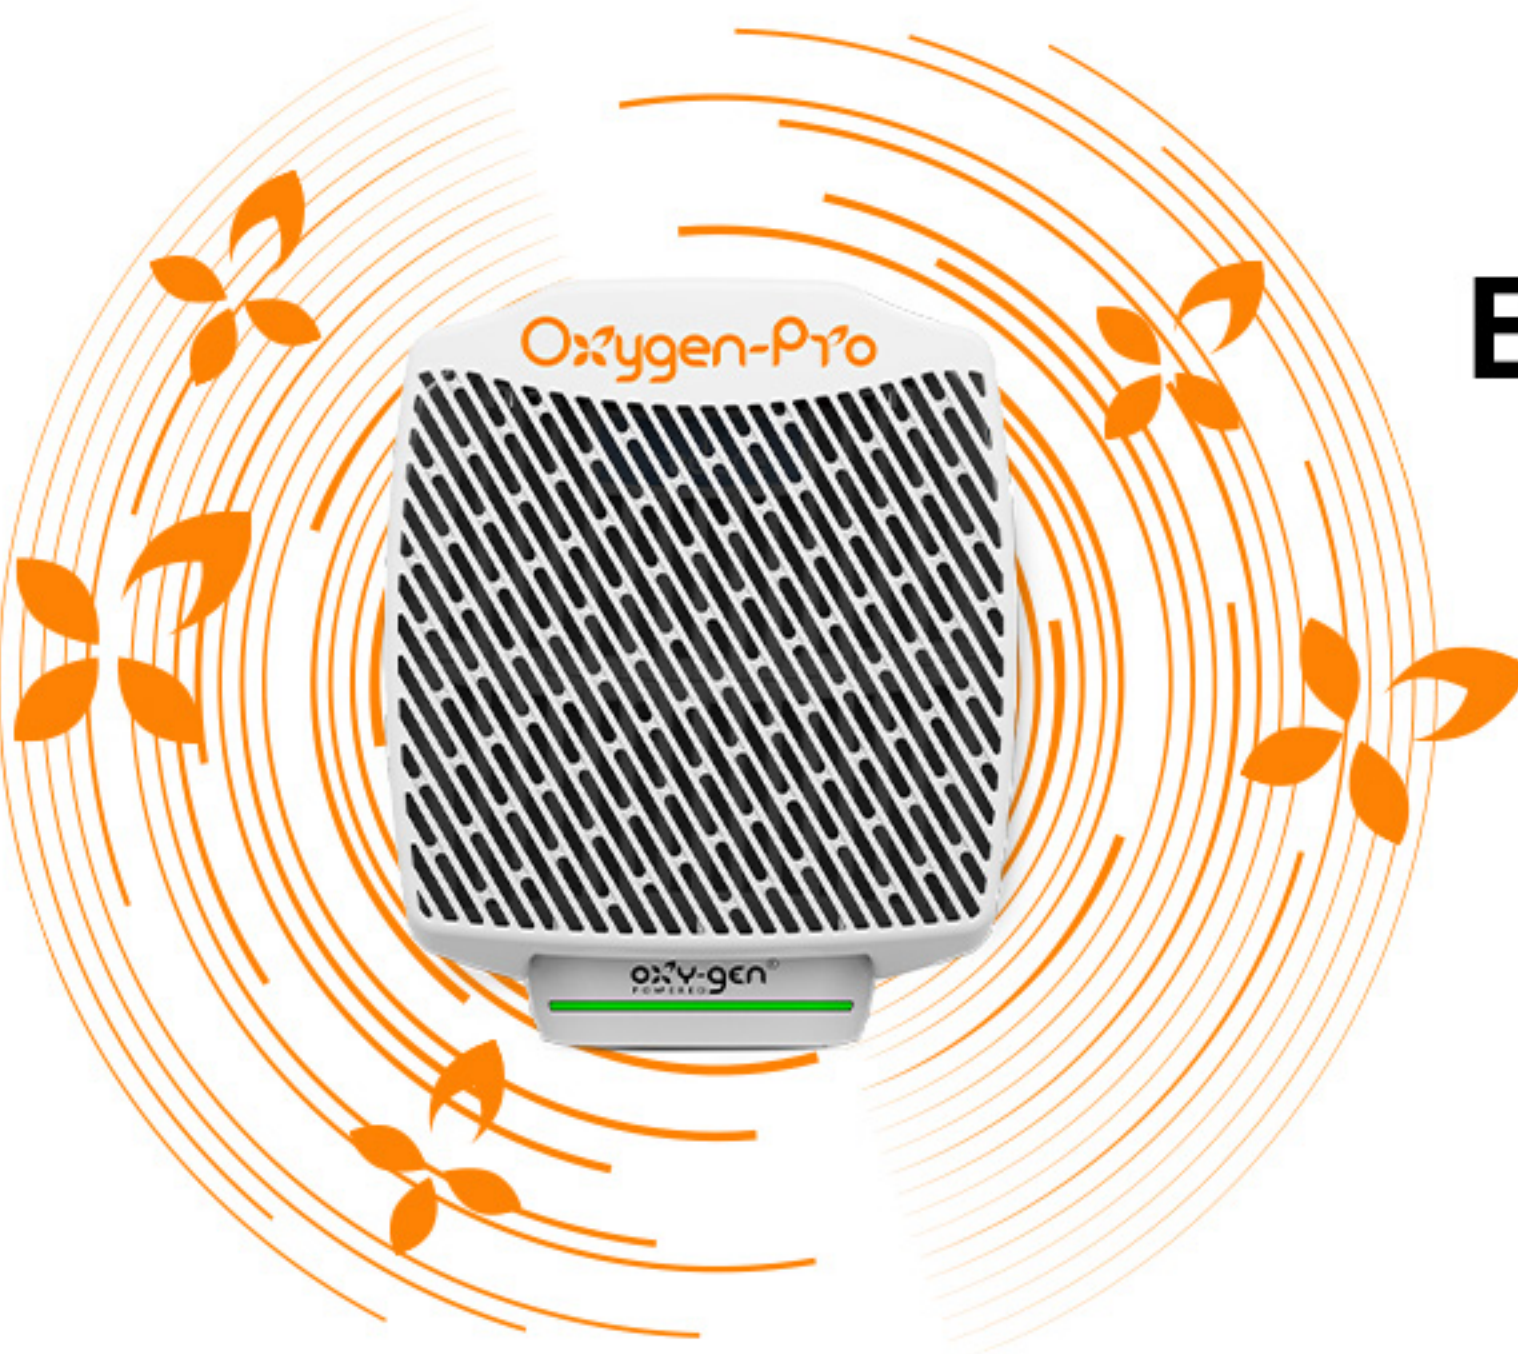

MYTH #2: Oxy-Gen Powered® system needs to be installed near the door.

FACT: Oxy-Gen Powered® does not need the airflow generated by opening/closing the door. In fact, we insist that our dispensers should not be positioned near the door, as the fragrance may be sucked out.

The system can be positioned at any height, even below the sink. It is best to install the dispenser at the far end of the room, with the least airflow for maximum impact.
